

Dear Doctor.

Really I don't intend to impose the task of writing my work out in detail, but in my letter of yesterday I neglected to enclose the within, which I afterward found on my table. — In looking over my Millions, and comparing my *S. Florida* with Andersson's *S. lugipes*, I suspect we mean the same thing. But ask Eaton to look at my "Ms and see whose blunder makes me say "Leaves thin, 2'-3' long, 1' in diameter, enveloped" &c. — It should be "Leaves thin 2'-3' long; fruiting ament 2'-3' long, 1' in diameter, enveloped" &c.

Harris wrote you yesterday, I have nothing more to add now

Respectfully  
A. W. Sheepman
